

GUIDE 05

Adding partner school logos

Show a school or college in the "Trusted by" line and the schools strip, and take it off again.

Saving is not publishing. Nothing reaches the website until its **Published** switch is on. After publishing, allow up to **5 minutes**, then reload the page twice.

Add a school or college

[Contacts](#) → [New](#)

1. Tick **Company** (not Individual).
2. **Name**: shown next to the crest.
3. **Image**: upload the crest at the top right. Square, on white or a transparent background, works best.
4. **Tags**: add `School`.
5. Switch **Published** on (the website publish button on the contact).

The logo appears in the "**Trusted by Leading Schools**" line under the home page headline and in the scrolling schools strip on the home and About pages. A school with no image is skipped rather than shown as an empty box.

Remove a school

Take the `School` tag off. The logo leaves the website but the customer record, its history and its invoices stay. Only delete the contact if it should be gone from Odoo entirely.
