

GUIDE 07

Editing the About page

Change the long text on the About page yourself.

Saving is not publishing. Nothing reaches the website until its **Published** switch is on. After publishing, allow up to **5 minutes**, then reload the page twice.

Edit the About text

Knowledge → article "Website: About"

1. Open the article titled exactly **Website: About**.
2. Edit the text. Headings, lists, quotes and images all work.
3. Keep it **Published**.

Do not rename the article. The website finds it by that exact title. If it is renamed, unpublished or deleted, the About page falls back to the built-in text.

What this does not cover

The About page headline, the "RoboNest Advantage" cards, the lab list, the team (guide 04) and the school logos (guide 05) come from elsewhere. The headline and cards are built into the website (guide 15).
