

GUIDE 10

Tags: where things appear

Every tag the website understands, and what it does. Tags control placement; nothing else is needed.

Tag	Used on	What it does
Homepage	Events, blog posts, videos, employees	Features the item on the home page
Popup	Events	Corner popup on every page and Nesty's announcement. The soonest upcoming tagged event wins.
Info Only	Events	Announce the event with no sign-up form
Short	Videos	Vertical, phone-shaped frame
School	Contacts	Puts the logo in the schools strips
Leadership	Employees	Large photo card with a quote
Executive Team	Employees	Circular portrait
Astronomy , AI & Robotics	Events, posts, videos	Topic grouping and filter buttons
Workshop , Exhibition	Events	Topic grouping
Announcement	Blog posts	Filter button on the blog
Lab Setup , Student Projects , Events	Videos	Filter buttons on the Videos page

No tag is fine. An untagged item still appears on its own listing page (Events, Blog). Tags only add extra placement.

Tag names must match exactly, including capitals and spaces. Pick them from the dropdown rather than typing new ones; a misspelt tag (for example "Home page") does nothing.
